IGV OPEN DAY: IGV Group showed off its new manufacturing process and assets, representing a EUR3.5-million (US\$4.6-million) investment, to more than 300 customers, suppliers, members of the press, and employees and their families earlier this summer in Vignate, Italy. A tour of the technology and design of the company's 22,000-m² factory was a highlight of "IGV Open Day," which also included a post-tour celebration.
