DomusLift is the IGV Group outstanding and successful homelift, ideal for vertical transport requirements and for overcoming architectural barriers in both public and private buildings. It is the ideal solution for elderly persons and those with impaired mobility who gain independence and freedom from stairs.

The automatic sliding doors, available on request as an option instead of the standard panel landing door, offer a user-friendly use just like any traditional lift. The wide choice of accessories and finishes, together with S and XS versions, conceived for small spaces, and XL, designed for wide cars, makes DomusLift ideal for any requirements.

DomusLift perfectly fits any new or existing environment, while adding value to it.

10 good reasons for choosing DomusLift:
- Overcomes architectural barriers
- Compact, quiet and easy to install
- Power consumption like any household electrical appliance
- Connects to any electrical 230V outlet
- More than 50 models, for indoor and outdoor
- Standard panoramic glass door
- Reduced maintenance costs
- 3-year warranty
- Customised product
- Made in Italy
Elegance and style

The special models MADE WITH SWAROVSKI ELEMENTS, Liberty with Trend mosaic, Light-Touch by Giugiaro Architettura, Leather, Carbon, Chrome, Classic and Art Line, add exclusive style and elegance, while enhancing any environment.

DomusLift is a Made in Italy product, guaranteeing state-of-the-art technology by IGV Group. IGV Group is a company with headquarters in Milan (Italy). The company has had a leading role in the design and manufacturing of lifts and lifting platforms since 1966.
A user-friendly home

AS SIMPLE AS THAT
DomusLift quick installation procedure requires minimum builder’s work, thanks to the reduced pit and headroom. The installation also needs limited regulatory approval and benefits from reduced maintenance costs and low energy consumption by using the standard household 230V mains supply.

SAFETY
The car is enclosed on three sides and the infrared barrier on the access side guarantees passengers’ safety. The enabling key on the pushbutton panels prevents the use from unauthorised persons. In case of power failure, an automatic controlled device brings the car back to the landing and allows the exit of passengers.

ACCESSIBILITY
DomusLift offers a choice of extremely functional and customisable solutions with special accessories, such as the powered door opening and landing calls. DomusLift is an affordable solution ideal for those with impaired mobility or special needs.

VERSATILE
DomusLift is a truly all-around product, designed and manufactured to meet a wide range of needs and tastes. From the garage to the roof, DomusLift travels effortlessly up to seven floors.
Indoor and outdoor

ALUMINIUM SHAFT STRUCTURE
The aluminium shaft structure is exceptionally light and robust allowing to place DomusLift anywhere, even outdoor. It guarantees an enhanced usability of spaces without affecting the architectural context.

The structure is supplied as standard, the aluminium structure does not require any surface processing, it does neither deform, nor require any maintenance and it is weather-proof and does not change over the time.
DomusLift can also be installed within your house in a special masonry or reinforced concrete shaft.
EXISTING BUILDINGS
Thanks to its versatility and flexibility, DomusLift is suitable also for the most challenging situations and allows the installation in any architectural context, both in new and existing buildings, buildings with historical constraints or featuring very narrow stair flights or reduced spaces.
DomusLift is the ideal solution for complete mobility within public and working areas. Thanks to DomusLift, shops and restaurants, shopping centres, offices, hotels and factories offer easy access to all levels.

Installation flexibility, large service capacity and elegant aesthetics are just some of the DomusLift key features.
IGV Group focuses on energy saving and is fully committed to the safeguard of the natural environment.

DomusLift, the eco lifting platform, features a LED technology for the car lighting and is available in two versions: traction with inverter gearless motor for maximum performance and reduced consumptions, and hydraulic, with 100% biodegradable green oil (upon request).

DomusLift has been awarded the prestigious international certification of Class A energy efficiency by the certification bodies: TÜV SÜD and IMQ.
The two sides of Design

Aluminium

Interior spaces with distinctive features for the Aluminium car model and even cleaner aesthetics. Aluminium profiles frame the interchangeable walls to dress the space in an ever-changing way or to remove any visual obstacle, choosing a fully panoramic solution.
The Steel car model interprets an essential and elegant aesthetics where the absence of wall profiles offers maximum linearity and visual continuity, while the wide range of finishes, to choose between painted, plastic-coated sheet metal or stainless steel, allows for unlimited creative possibilities.
XS - Extra-Small

XS, the slimmest DomusLift ever. The new and extremely narrow DomusLift model is designed to fit the smallest shafts thanks to its extremely reduced dimensions. Shaft structure dimensions start from 65 x 91 cm. Available only with Steel car.
DomusLift with automatic doors

The DomusLift range grows thanks to the chances offered by the European Machinery Directive 2006/42/EC. DomusLift is also available with 2-, 3- or 4-panel sliding automatic doors, featuring a reduced sill. The use of automatic doors allows for the elimination of the 'hold-to-run' operation by replacing it with the more practical and user-friendly APB (Automatic Push Button). In case of power failure, automatic return to landing and door opening are operated.
The DomusLift Classic range is designed for those who love the warmth and natural beauty of wood. The wood effect is obtained using a special painting method on the aluminium structure.

Classic style

DomusLift Chrome

Brand new geometries with perfectly matching combinations between steel surfaces with polished and satin finishes alternating on the car walls and creating a pattern of blank and solid areas.

Model with V1 full glass door, polished anodised aluminium shaft structure and car pushbutton panel embedded in the handrail.
Crystal clear
Crystal shine, transparency and elegance are combined with high tech design. A new exclusive DomusLift is born: DomusLift MADE WITH SWAROVSKI ELEMENTS, a triumph of steel, glass and precious reflections.

Designer: arch. Arianna Callocchia

Leather inner finishes
Leather is synonym of class, elegance and superior quality for interior environments and now is also available in the range of DomusLift car walls, for a new concept of luxury.

Model with gold anodised aluminium shaft structure and door frame, bronze glass, ivory leather wall and golden SuperFlat landing pushbutton panel.
Limited Edition

The new DomusLift Art collection featuring Italian art masterpieces... start dreaming!

Artistic homelift

The Art Line is a highly artistic range. The classic stainless steel car becomes a décor component and perfectly fits any environment. It's an all-new trend compared to traditional lifts.

Model with 2AT window automatic doors, natural anodised aluminium finish for shaft structure, door frame and panels, ‘Ramos’ car wall and ‘Arcobaleno’ floor.
High-tech design

The DomusLift elegance is further enriched with Giugiaro Architettura innovative lighting system, offering new in-car environments and atmospheres and the subtle sophistication of the touch screen control panel.

Liberty appeal

The unique Liberty mosaic made with handcrafted glass shapes lighting effects by alternating smooth and wavy, chromed and iridescent tiles, which enhance and beautify DomusLift surfaces.

Model with panel panoramic door, RAL 9010 painting for shaft structure, door frame and car profiles, bronze glass, car wall and floor with Liberty Amber mosaic.
